

VICTIM ASSISTANCE PROGRAM

*Connecting Victims With the
Trusted Help They Need.*

#1 WAY TO HELP VICTIMS LONG AFTER A CRIME

3Di System's Victim Assistance Program is one of the fastest, most effective ways to connect crime victims with the services and support they need to heal. Citizens can request assistance easily—any time, anywhere.

THE 3Di ADVANTAGE

Victim Assistance gives citizens who have suffered through a crime the ability to access valuable services as quickly as possible, all in one universal portal. At 3Di Systems, we work as your partner, helping you to implement the right, cost-effective technologies to create engaging, more responsive, streamlined processes.

With an array of solutions built to help digitally transform government and public sectors, 3Di Systems has partnered with countless communities. Our cloud-based technologies have increased capabilities and improved services for cities/counties across the nation.

At the core of this great technology is the 3Di Community Platform. This scalable and secure foundation provides all the features necessary to support solutions for law enforcement, fire prevention, rent control, and citizen engagement.

3Di VICTIMS ASSISTANCE PROGRAM

The Victims Assistance Program is a quick, secure and easy way for victims to compile and apply for all of the services they need, all in one place. The digital platform can help citizens to access everything from phone numbers, to key benefits that can help pay for crime-related expenses.

Victims can get information on medical/dental resources, mental health services, help with funeral expenses, relocation, support events, victim rights documents, and much more, on-demand. Government workers can easily access reports, work on case management files, access compliance data, as well as more quickly intake victims and their family members.

**The Victim Assistance Program (VAP) is a module
within the 3Di Protect Solution.**
