

RENTAL INVENTORY REGISTRY

*Better Housing Programs Start with
Accurate Inventory.*

WHY A RENTAL REGISTRY?

Rental prices are soaring and knowing rental inventory, ownership and prices are becoming increasingly necessary. When it comes to creating housing programs that truly benefit citizens, starting with a strong foundation is a must. With 3Di Rental Registry, you'll be able to accurately manage your community's property portfolio, while ensuring your affordable housing programs are compliant and successful.

THE 3Di ADVANTAGE

3Di Rental Inventory Registry is the industry leader when it comes to effectively managing dynamic affordable housing solutions.

At 3Di, we work as your partner helping you to implement the right cost-effective solutions and technologies to create engaging, more responsive, streamlined processes.

With an array of solutions built to help digitally transform government and public sectors, 3Di has partnered with countless communities. Our cloud-based solutions have increased capabilities and improved services for local/state governments across the nation.

At the core of this great technology is the 3Di Engage Platform. This low-code, secure foundation provides all the features necessary to support solutions for affordable housing, fire prevention, and community engagement.

3Di RENTAL REGISTRY SOLUTION

With the 3Di Rental Inventory Registry, you'll be taking one of the most important steps towards establishing an accurate rental property inventory established by parcels and units. The Rental Registry enables local/state leaders to make informed decisions by providing real-time access to the essential data you need, the moment you need it.

3Di Rental Inventory Registry was built with communication between local/state government leaders and property owners. The registry will empower owners to provide, and keep up-to-date, the essential property information your community needs to make the best decisions possible. Not only does this help to create an invaluable database of current properties, it will give your local/state leaders the ability to better manage evictions, stabilize rent, and perform rental property inspections more quickly and effectively.
